

INSTALLATION FOR DUMMIES

Please note: If you have an issue executing these instructions, re-read this and don't dm me :)

1. Download and install [Modrinth](#)
2. Download the modpack [here](#)
3. Open file and wait for it to download inside the Modrinth launcher

-Ram settings-

4. Select Library, Select the pack, and hit options.
5. After selecting the options panel scroll down to the “Java” settings.
6. Check the “Override global memory settings” checkbox. Then enter “**6144**” in the textbox.

Java memory

☒ Override global memory settings

FAIR WARNING

For probably the first time, you **WILL NOT** be able to start by punching trees.

“How do I get started then?!”

We have a mod called “[Early Stage](#)” that controls the way early minecraft activities work. To start out you'll need to break leaves to get sticks, find gravel to get flint, gather rocks, craft a crafting rock, put sticks and flint on it and hit it a couple times with another rock.

Just like the cavemen we are... Enjoy :)
